ALGAE Oil

Algae Oil – 40% DHA is a vegan-friendly alternative to animal-derived sources of Omega-3 essential fatty acids, pressed from microalgae scientifically known as Schizochytrium sp. The material has a bright orange to red appearance with a characteristic aroma and flavor profile. Having a minimum of 40% DHA content, docosahexaenoic acid, this oil has been growing in popularity over the years throughout the nutraceutical industry, allowing a plant-based supplement option of omega-3 fatty acids essential for the human body and overall health. Additionally, bulk algae oil, often referred to as algal, is gaining traction in the personal-care and cosmetic realm as further research reveals potential benefits when applied directly to the skin such as deep moisturization, anti-aging properties, unclogging of the pores, and improving discoloration.

Andiroba Seed Oil

(Carapa guianensis) Virgin

Cold-pressed, extracted from the seeds of the Andiroba tree, primarily found growing wild throughout the Amazon rainforest. Andiroba seed oil is a viscous liquid carrying a light yellowish to medium brown appearance with a sweet characteristic aroma. Andiroba seed oil is naturally rich in antioxidants, Vitamins A, C and E content, and essential fatty acids. This raw ingredient is quickly growing in popularity throughout the cosmetic and personal-care industries

due to its beneficial impact on the hair and skin. It is known to be an effective emollient and is easily absorbed into the skin, promoting skin elasticity while conditioning especially dry skin types.

4 Oz \$ 20.00 16 Oz \$ 60.00

Argan Oil

(*Argania spinosa*)

Virgin Organic

Description: Grown in North Africa and mainly in Morocco, the Argan tree grows wild in semi-desert soil, and is extremely well adapted to drought. Argan Oil is produced from the seeds of this plant, and it is considered to be one of the rarest oils in the world due to the small and very specific areas in which it is grown.

Color: Pale yellow to golden yellow liquid.

Aromatic Description: Argan Carrier oil has a strong earthy scent that is quite characteristic of this oil when it is raw and unrefined.

Common Uses: Organic Argan Oil is rich in antioxidants and omega 6 fatty acids, and it is believed to contain saponins and twice as much vitamin E as Olive Oil. This oil supports the hydration of the skin and helps to soften it, thereby minimizing the appearance of fine lines. It can also be used to improve the texture of acne-prone skin, helping it to maintain a youthful, glowing appearance. Organic Argan Oil can be used to manufacture soaps, creams, facial products, hair care products, and as an ingredient in creams for mature skin and even aftershave lotions for men.

Consistency: Typical and Characteristic of Carrier Oils.

Absorption: Absorbs into skin at average speed, leaving a slight oily feeling on the skin.

Shelf Life: Users can expect a shelf life of up to 2 years with proper storage conditions (cool, out of direct sunlight). Refrigeration after opening is recommended. Please refer to the Certificate of Analysis for current Best Before Date.

Cautions: None Known

Babassu Oil

Organic

Extracted from kernels found within the fruit of the babassu tree. Organic babassu oil undergoes a refining process which results in a clean, soft-solid oil at room temperature with a whitish color. Refining also removes the odor and taste from our organic babassu oil. Due to its high content of saturated fatty acids, primarily Lauric Acid (C12:0), the oil is highly resistant to rancidity. The physical characteristics and uses of organic babassu oil are very similar to that of coconut oil.

Baobab Oil

Adansonia digitata
(Virgin Organic)

Virgin Organic Baobab Oil is a cold-pressed oil extracted from the large baobab fruits produced by the *Adansonia digitata* trees native to Africa, which carries a nutty characteristic aroma and golden yellow appearance. This material is liquid at room temperature and non-hydrogenated, used for cosmetics only and not for consumption. Virgin organic baobab oil is widely used in the personal care and cosmetic industry to manufacture lip balms, skin moisturizing lotions, face and wrinkle reducing creams, and bar soaps. Baobab fruit has been nicknamed the "superfruit" due to its naturally occurring levels of Omega-3 fatty acids, antioxidants and vitamin C, making it a favorable ingredient in topical skincare formulations.

4 Oz \$ 20.00 16 Oz \$ 60.00

Broccoli Seed Base Oil

(Brassica Oleracea Var. Italica)

Description: The Broccoli Seed Carrier Oil is extracted using the cold press method. The fatty acid composition of this oil is unique and composed of approximately 50% Erucic Acid (22:1). Its excellent anti-oxidant profile makes Broccoli Seed Oil an easy substitute for the activity of silicones where the film forming activity results in a natural shine, and cuticle smoothing of the hair while preventing oxidation. The Broccoli Seed Oil is light, non-greasy, and is easily absorbed into the skin.

Color: Light golden to a deeper green.

Aromatic Description: Broccoli Seed Oil has an herbaceous scent that is noticeable if used in large amounts in a product. To avoid this distinct scent, formulators should take this into account.

Common Uses: Broccoli Seed Oil is fast becoming the preferred oil for hair-care products, as it imparts a distinctive shine to the hair beyond that which is given by other plant oils, and has been informally referred to as a 'natural' dimethicone. It is particularly effective in hair-care preparations such as shampoos, conditioners, and styling products, but also valued in lotions, balms, creams, and serums.

Consistency: A slightly viscous liquid oil.

Absorption: Broccoli Seed Oil creates a light gloss on the hair and is absorbed by the skin fairly quickly compared to other carrier oils.

Shelf Life: Users can expect a shelf life of up to 2 years with proper storage conditions (cool, out of direct sunlight). Refrigeration after opening is recommended. Please refer to the Certificate of Analysis for current Best Before Date.

Cautions: None Known, but is not for internal use.

Buriti Oil

(Mauritia flexuosa)

Buriti Oil, is cold-pressed extracted from the pulp of the buriti plant, a member of the palm tree family. Virgin buriti oil carries a vibrant characteristic orange-red color due to its natural high concentration of beta-carotene content. This buriti oil is completely unrefined and has an earthy to woody aroma.

Buriti oil is a favorable ingredient throughout the cosmetic and personal-care industries, sought after by formulators for topical skin and haircare applications. Its natural emollient properties make it an ideal additive in various moisturizing products such as lip balms, face creams, body lotions, and serums. Due to its high content of beta-carotene in addition to being rich in palmitic, linoleic, and arachidic acids, Buriti oil is known to carry antioxidant

activity and benefits to end-products. This ingredient is commonly found in topical products intended to help protect the skin from sun-damage.

4 Oz \$ 39.00 16 Oz \$ 117.00

Cactus (Prickly) Pear base Oil

(Opuntia ficus indica)

Description: Prickly Pear Carrier Oil is derived from the small black seeds of the prickly cactus botanical (*Opuntia ficus indica*) growing in the deserts of Morocco. Rich in Omega-6 Fatty Acids, naturally occurring carotenoids, flavonoids, and Vitamins C and E, this skin-toning oil contains powerful antioxidants that keep the skin looking soft, supple, and vibrant. This cosmetic grade oil has been refined to make it ideally suited for a variety of cosmetic applications.

Color: Pale Yellow to Golden Yellow Liquid.

Aromatic Description: Typical and characteristic of Carrier Oils.

Common Uses: Ideal for skincare and personal care products, Prickly Pear Oil is commonly used in facial products targeting mature or aging skin. It is also popular in soaps, shampoos, hair masks, and massage products.

Consistency: Typical and characteristic of Carrier Oils.

Absorption: This oil has a very good absorption rate and leaves the skin feeling silky and hydrated without an oily feeling.

Shelf Life: Users can expect a shelf life of up to 2 years with proper storage conditions (cool, out of direct sunlight). Please refer to the Certificate of Analysis for the current Best Before Date.

Chia Seed Oil

(Salvia hispanica L.)

Organic Extra Virgin

Extraction Method: Cold Pressed

Processing Type: Unrefined

Description: Chia Seed Organic Carrier Oil is extracted from the seeds of the organically grown *Salvia hispanica* plant, which are mostly grown in the South America. Chia Seed oil is a commonly used culinary oil in the region. Chia Seed oil is meticulously extracted at low temperatures to preserve the nutritional properties of the oil.

Color: Golden bright yellow liquid.

Aromatic Description: Mild nutty scent, characteristic of most carrier oils.

Common Uses: Chia Seed Organic Carrier Oil consists of the perfect 3:1 ratio of Omega 3 to Omega 6 Essential Fatty Acids required for optimum skin health. Chia Seed oil is a rich source of Antioxidants and Phytonutrients, which protects the skin against the abuse of environmental elements and helps to reduce the appearance of aged skin. Chia Seed oil is an ideal ingredient for moisturizing formulations, as it reduces the water loss by protecting skin's moisture barrier, keeps the skin hydrated, and makes it look plump and radiant. Chia seed oil can be also be used in formulating lotions and creams meant for soothing dry and itchy skin.

Consistency: It has typical characteristics of most carrier oils.

Absorption: Absorbs into skin at average speed, slight oil feeling left on skin.

Coconut Fractionated

(Cocos nucifera)

Fractionated 100% Coconut Organic Oil (Coconut Fractionated) does not go solid at room temperature. This oil stays liquid and clear. It is highly stable and resistant to oxidation for use in creams, lotions, and many other cosmetic preparations for skin and hair. Because it is chemically indifferent to other cosmetic ingredients, it acts as a viscosity regulator and assists in the dispersion of pigments and other additives. Further, it penetrates the skin readily, thus acting as a carrier for transdermal therapeutic ingredients. This ability to transport Essential Oils and actives makes it an oil of choice among medical practitioners and massage therapists.

Our MCT 60/40 Fractionated 100% Coconut Organic Oil (Coconut Fractionated) meets the quality standards of the FDA, Health Canada, and the European Pharmacopoeia for use in Health & Beauty products.

Color: Clear, colorless to very pale yellow liquid.

Aromatic Description: Coconut Fractionated Organic Oil has a characteristic scent to it.

Consistency: Typical and Characteristic of Carrier Oils.

Absorption: Non-greasy and absorbs easily into the skin.

Hibiscus Seed base Oil

(*Hibiscus Sabdariffa*)

Description: Hibiscus Carrier Oil is obtained from the seeds of the *Hibiscus sabdariffa*, an annual, herbaceous shrub native to South East Asia. It belongs to *Malvaceae* family and is commonly known as "red sorrel" or "roselle". It grows up to 6-8 feet, has bright red stems, with green leaves accented by red veins. It bears white to pale yellow flowers with a dark red spot at the base of the petals, which is a typical characteristic of a Hibiscus flower. The seeds are extracted when the fleshy and bright red fruit matures, and the seed capsule turns brown and splits open

Color: Pale yellow to golden yellow liquid.

Aromatic Description: Mild nutty aroma.

Common Uses: Hibiscus seeds contain a naturally gentle form of alpha hydroxy acids (AHA) and a high concentration of Omega-6 Linoleic Acid which helps to keep the skin moisturized and is ideal for soothing dry skin, flaky, and acne-prone skin. Hibiscus Oil is also rich in flavonoids, carotenoids, and tannins which make it an effective antioxidant that protects the skin against environmental elements. Hibiscus Oil is a versatile oil with a pleasant texture that leaves a silky feel on the skin. It helps maintain radiant skin and healthy-looking hair. It is well suitable for use in a wide range of personal care applications intended to soothe sensitive or aging skin. Hibiscus Carrier Oil is perfect for skin care and hair care formulations where emollience and deep moisturization are desired.

Kukui Nut

(*Aleurites Moluccana*)

Description: Also known as Candlenut Trees, Kukui Nut trees grow up to 20 meters in height and are distinctive in their light green, silvery foliage. They usually grow wild on the lower slopes of the mountains.

Color: Light yellow to yellow clear liquid.

Aromatic Description: Typical characteristic scent of carrier oils.

Common Uses: Unrefined Kukui Seed Carrier Oil is cold-pressed from the kernels – or the “nuts/seeds” – of the Kukui Nut tree to retain high levels of natural polyunsaturated fatty acids. This light oil is used today in all high-quality skin preparations due to its ability to quickly penetrate the skin. For centuries Hawaiians have used Kukui Nut oil to protect skin from salt water, harsh sun, and drying winds. Due to their high oil content, Kukui seeds were burned to provide light, hence earning the nickname Candlenut. It is ideal for application on skin afflicted by dryness, psoriasis, eczema or any severe condition. It can also be used in hair care, bath products, cleansing products, and shaving products.

Consistency: Typical and characteristic of carrier oils.

Absorption: Absorbs into skin at a medium absorbency rate, leaving a slight oily residue on the skin.

(*Perilla frutescens*)

Description: The Perilla Seeds are cold pressed to produce an oil rich in vitamins and amino acids. Approximately 50-60% of the oil is Alpha-Linoleic Acid (ALA) which is an Omega-3 fatty acid. The high ALA content helps the skin and hair retain moisture; the Omega-3 fatty acids are polyunsaturated fatty acids that are known to revitalize the skin and is commonly used to improve the appearance and texture of skin.

Color: Pale yellow to golden yellow liquid.

Aromatic Description: Typical and Characteristic of Carrier Oils.

Common Uses: Organic Perilla Seed Oil is known to have cleansing properties which makes this a good oil for facial products. It retains moisture in skin and hair and is helpful when dealing with skin conditions. It can be used in manufacturing of soaps, facial blends, creams and lotions.

Consistency: Typical and Characteristic of Carrier Oils.

Absorption: Organic Perilla Seed Oil is readily absorbed by the skin.

Pomegranate Seed

(*Punica granatum*)

Virgin Raspberry Seed Oil. Virgin raspberry seed oil is cold-pressed extracted from the raspberry seeds without solvents or chemical processing. The appearance of our virgin raspberry seed oil is a medium dark brown liquid with a tint of green. This oil is high in essential fatty acids and commonly used in the cosmetic and nutritional supplement industries. Omega-6 fatty acids are typically present at a level of 50-60%. It is naturally high in tocopherols which provide antioxidant activity. Topical application of virgin raspberry seed oil may help maintain skin softness and hydration. Our exquisite organic Raspberry Seed CO₂ – a specialty carrier oil that is highly valued in body, skin care, and cosmetic use – is an exceptionally light, dry, non-occlusive oil that is quickly absorbed into the skin leaving it moist and nourished without a greasy or sticky feel.¹ A high antioxidant and phospholipid content gives this carrier oil its long shelf life^{2,3}, much longer than cold pressed carrier oils. The low temperature CO₂ process (up to 104°F/40°C) ensures a product that more closely resembles that which is found in the raw plant material.⁴ In addition, CO₂ carrier oils meet strict heavy metal requirements and contain no carbohydrates, protein, or inorganic salts.⁵

Rosehip Oil Base Oil

Virgin Organic

(Rosa Canina)

Rosehip Carrier Oil (Virgin) is a rich source of essential fatty acids and vitamin E. It is called Virgin because the oils are produced from the first pressing of Rosehip seeds. The obtained oil has excellent absorbance capacity that quickly gets absorbed by the skin and does not leave any oily feeling on the surface of the skin

Rosehip oil has an orange to red complexion with a characteristic scent. Organic Rosehip oil is a highly sought after ingredient throughout the personal-care and cosmetic industry due to its beneficial properties for the skin and hair. It is found in a wide array of topical products such as skin and face serums, creams, body lotions, lip balms, and moisturizers. Natural variation may occur due to virgin organic rosehip oil being an unrefined material.

- Rosehip Carrier Oil (Virgin) is used to keep skin healthy.
- The oil is used as enhancing oil.
- It is widely accepted in different industries that manufactures cosmetic products, skincare and hair care products.

Sacha Inchi Oil

(Plukenitia volubilis L)

Extra Virgin / Organic

Description: Sacha Inchi oil is obtained from the organic seeds of the Sacha Inchi plant, which grows in the Peruvian Amazon Rainforest. It is one of the richest vegetable sources of polyunsaturated fatty acids (PUFA), namely Alpha Linolenic Acid (Omega 3), Linolenic Acid (Omega 6), and Oleic Acid (Omega 9). Sacha Inchi oil is extracted at low temperatures through the cold-press process

method. Its high concentration of Vitamin E preserves the nutritional properties, freshness, and stability of the oil without the need for any additives or preservatives.

Color: Clear, light yellow liquid.

Aromatic Description: Mild nutty scent, characteristic of most carrier oils.

Common Uses: Sacha Inchi oil is used in formulations meant for mature skin, creams, and lotions due to its exceptionally high antioxidant and skin smoothing properties. It soothes dry, irritated skin and damaged hair making it ideal for use in liquid soaps and shampoos.

Consistency: It has typical characteristics of most carrier oils.

Absorption: It is light and absorbs quickly into the skin without leaving an oily residue.

Sandalwood Nut Base Oil

(Santalum spicatum)

This is a lightweight, non-greasy and highly absorbable (depending on skin type

an ideal addition to a myriad of products for the hair and body, as well as for facial rejuvenation creams and serums. It is quite stable relative to other seed oils - it has been extracted from the seeds of the Sandalwood species native to Australia, *Santalum spicatum*, using only CO₂ gas as the solvent it has an ancient history of use by the aboriginal people of Australia through the consumption of Sandalwood nuts as a traditional medicinal food. Scientific studies are only now catching up with this indigenous knowledge. Sandalwood Nut Oil's properties related to circulation are being attributed to the ximenynic acid (XA) content - a compound almost uniquely found within this botanical - and have inspired new initiatives to develop superior methods of extraction.

Storage Suggestions: We recommend that this oil be stored in a refrigerator and used within 4 years of the purchase date.

Blending Suggestions: Depending on the type of product you are formulating, you can use between 2% to 100%. For a facial serum, we suggest 2% to 50%. For a massage oil, we suggest combining 5% to 20% Sandalwood Nut CO₂ with 80% to 95% of another carrier oil, or a combination of other carrier oils.

Solubility: Soluble in fixed oils, insoluble in alcohol.

Appearance: Very pale yellow/brown to almost colorless, somewhat viscous, transparent liquid vegetal oil

Aromatic Profile: Dry, very mild, woody, slightly sweet, warm fatty/nutty aroma. DOES NOT have the aroma of Sandalwood Essential Oil.

Sea Buckthorn Base Oil

(Hippophae rhamnoides L.)

Color/ Consistency: Deep reddish orange to dark brown liquid. Solid at cold temperatures and clumpy at room temperature because of its unique constituent profile. We recommend placing the bottle in a very gently heated hot-water bath, and changing the water frequently until it is back to a more liquid state, but do not overheat! Be sure to shake well before use.

Description: Sea Buckthorn (*Hippophae Rhamnoides*) is a spiny shrub or tree with bright red or yellow berries native to Europe and the northern regions of Asia. These berries are said to be the single highest vegetal source of Vitamin C, Vitamin E, unsaturated fatty acids and essential amino acids, along with beta-carotene, which gives them their bright color. This quality oil is extracted from the fruit using the CO2 extraction method.

Aromatic Description: This oil has a strong musky smell that is characteristic of Sea Buckthorn.

Common Uses: Aromatherapists use this oil in small amounts (10%) in their creams and oils. Sea Buckthorn is a fantastic ingredient in massage blends, an aromatherapy cream, facial serums, and in all types of high-end facial products. Please note that if not well diluted, Sea Buckthorn Oil may stain the skin and sheets.

Absorption: Absorbs into skin at average speed, leaving a slight oily feeling on the skin.

Tamanu Oil

(Calophyllum inophyllum)

Virgin Organic

Virgin Organic Tamanu Oil is obtained by cold pressing the blonde nut kernel of the *Calophyllum inophyllum* tree, a tree indigenous to Southeast Asia. The oil is then filtered, leaving a viscous green liquid. Tamanu oil is suitable for general skin and cosmetic purposes. It can be used directly on the skin or mixed within formulations. The oil is absorbed leaving skin feeling smooth, plump and soft without a greasy residue. It is used in lotions, creams, ointments and cosmetic products or alone. Tamanu oil is also touted for its use in formulations for massage.
